

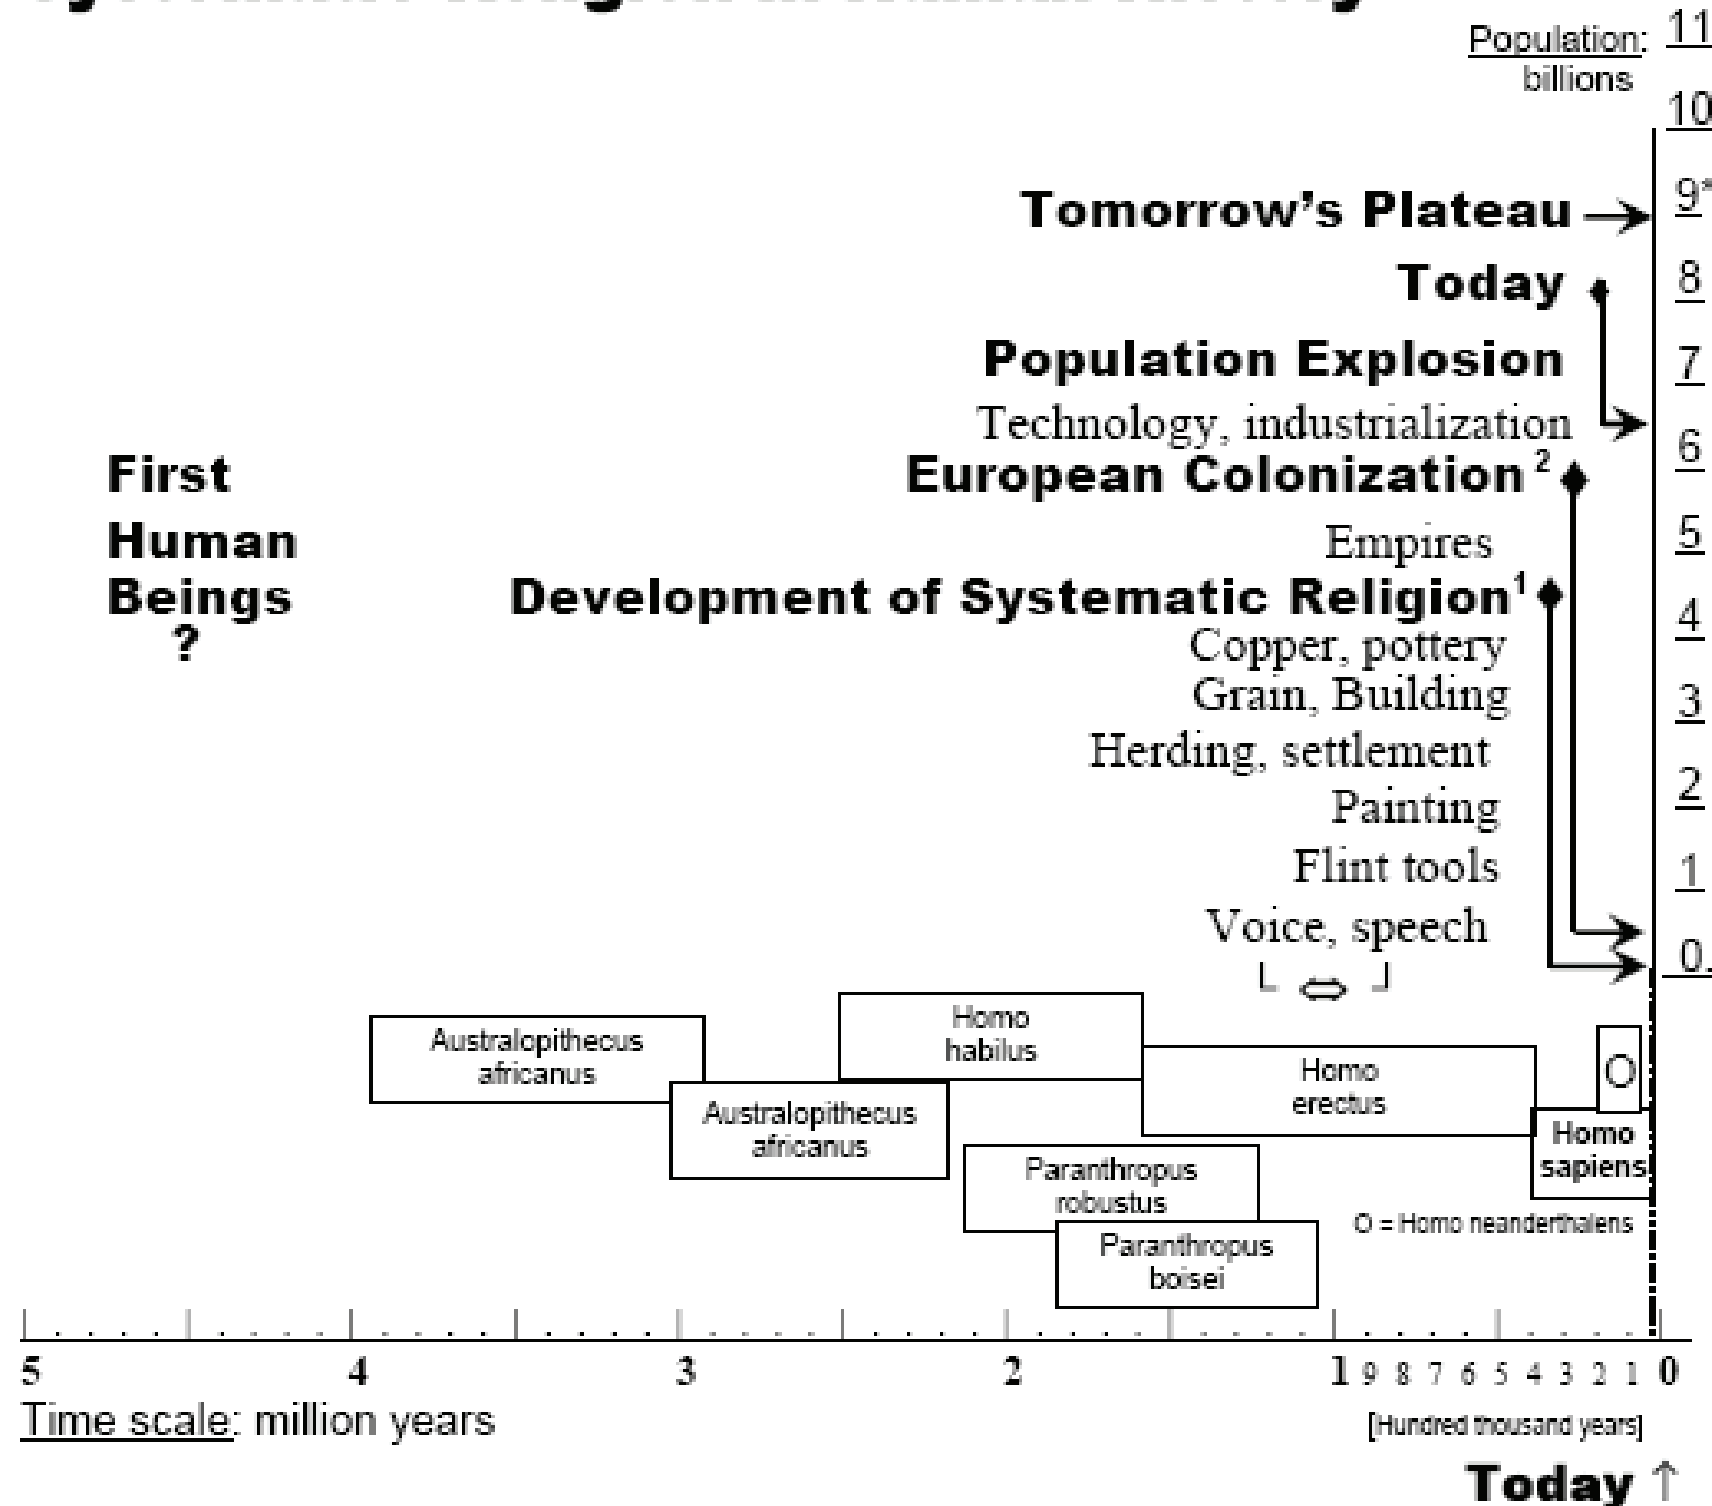

Chart 3

Systematic Religion in Human History

* Probable population peak about 2075 followed by a plateau just below 9 billion. (UNFPA State of World Population 2004, revision published April 2005.)

¹ Rising from 50 million to approach 150 million about 500 BCE. Not more than 250 million at the dawn of the Common Era.

² About double that, 0.5 billion, as European Colonization began.
